Chartered Market Technician (CMT) Program – Level II

The CMT Level II exam measures the candidates' competency in the **application** of concepts, theory, and techniques covered by the required readings. CMT Level II candidates must demonstrate their ability to apply concepts identified in their Level I studies to relevant conditions or scenarios.

Exam time length: 4 hours, 15 minutes

Exam format: Multiple Choice

The curriculum is organized into exam specific knowledge domains that provide a framework for recognizing and implementing investment/trading decisions. CMT Level II exam tests the candidate's knowledge in 12 domains:

1. Theory and History
2. Market Indicators
3. Construction
4. Trend Analysis
5. Chart and Pattern Analysis
6. Confirmation
7. Cycles
8. Selection and Decision
9. System Testing
10. Risk Management
11. Statistical Analysis
12. Ethics

Listed below is an alternative reading list for the CMT Level II exam. The official readings are contained in the forthcoming custom text published by Wiley due out in July. The CMT candidate is responsible for knowing and understanding the entire list of reading assignments.

As part of our ongoing re-investment in the CMT Program, we have entered into a publishing agreement with John Wiley & Sons to publish a custom text for each level of the CMT exams. Each level-specific text will be available through Wiley in eBook format in July 2015. As our publisher, Wiley is working diligently to produce a top quality offering as quickly as possible. We will continue to update you as we receive more detailed information.

With any change to established practices, there are some challenges. Making the transition simple and easy for candidates currently enrolled is one of our highest priorities. For candidates who have already purchased some of the books from the required reading lists or for those interested in starting their preparation for the October administration immediately, we have detailed a modified reading list below.

Please note, the content and curriculum topics covered in the books listed for each level will correspond to the same learning objectives and topics as seen in the custom text that will be published by Wiley. The specific readings and authors may vary from the reading list below. **Both methods of study are equivalent and will cover the same topics and prepare you for the exams.**
